

Diesel Service Technician CP—Licensure Information

UPDATED: 1/7/2025

Program Information:

The SLCC [Diesel Service Technician CP](#) program trains students to repair and maintain diesel equipment, such as trucks, buses, construction and mining equipment. This includes bulldozers, earth movers, cranes and other diesel-powered equipment. Diesel technicians use testing equipment like dynamometers, which measure engine power. Computer based diagnostic equipment is also used to assist in diagnoses of engines, transmissions, and other vehicle-based systems.

Additional Information:

Many employers in this field require applicants to have a valid Driver's License. Many employers also prefer applicants with a Commercial Driver's License (CDL).
