DECEMBER NEWSLETTER

December 2024

At SEEA, we are passionately committed to fostering an inclusive environment that recognizes and celebrates our student body's rich diversity. By embracing the variety of our experiences, we aim to cultivate a more supportive and cohesive community for everyone. Our dedication to diversity goes beyond mere words; it is a living principle reflected in our student access and success initiatives, comprehensive student success programs, and holistic support services. SEEA empowers students through mentorship, success coaching, and engaging workshops. Conveniently located in STC 101 on the Taylorsville Redwood campus, this vibrant hub is more than just a physical space—it embodies our identity. It is a gathering place where our community unites to learn, grow, and thrive together.

Finals

Final Exam and Final Grades
- Students scoring less than 50% on the final exam for developmental-level math courses cannot get a final grade higher than a C-.
- Students scoring less than 60% on the final exam cannot get a final grade higher than a D.

Tips for the Final Exam
- Work each multiple-choice problem before looking at the answer options. Be careful to select the option that matches your answer.
- Work on all of the problems on the test and show all of your work. Work each multiple-choice problem before looking at the answer options. Be careful to select the option that matches your answer.
- Work on all of the problems on the test and show all of your work on the open response questions.
- Memorize the slope formula, point-slope formula and the slope-intercept form of an equation.
- Pay close attention as to whether a line should be solid or dashed when drawing your lines for linear inequalities.
- Be sure to remember the shading when graphing linear inequalities.
- Pay close attention to the negative signs in problems.
- Be sure to multiply all terms by the lowest common denominator (LCD) when clearing the fractions in an equation.
- If the problem asks you to solve, graph, and give interval notation; be sure to solve it, graph it, and give interval notation. Sometimes students forget to do the interval notation.
- When asked to solve a system by substitution, be sure to use the substitution method.
- When asked to solve a system by elimination, be sure to use the elimination method.
- Please remember the answer to a system is usually an ordered pair. Sometimes students solve for one variable and then forget to solve for the second variable in the ordered pair.

"Success is the sum of small efforts, repeated day in and day out." – Robert Collier

Professional Staff
Cristina Guerrero Perez
Dream Center Coordinator

Cristina, a trailblazer as a first-generation student and DACA recipient, proudly achieved her Bachelor's degree in Writing and Rhetoric Studies from the University of Utah. During her undergraduate years, she played a vital role as the Writing and Rhetoric Fellow at the SLCC Dream Center, where she passionately supported students and collaborated on research projects centered on first-generation students and undocumented immigrants. Launching her career as an Admissions and concurrent Enrollment Advisor across Granite, Jordan, Canyons, and Murray school districts, Cristina forged strong relationships with staff and faculty while gaining valuable insights into resources for prospective college students. With a deep commitment to her community, Cristina strives to empower students, drawing from her own experiences to ensure they receive the support she once needed as a student herself.
